Splicetronics Solutions

Splice Tape is used to join component reels and reduce pick & place machine down-time

Advantages:

- Designed specifically for SMD carrier tapes of 8mm to 44mm
- Ensures that SMD component reels can be joined quickly and securely
- New innovative design with better handling and accuracy
- Used with the brass splice shim and splice tapes of any width

ST110 SPLICING TOOL

Description:

- Metal head with plastic handles
- Ergonomically designed for easy handling
- Includes guide pins for accurate reel placements
- Includes clamps to secure reels

* The splicing tool is available for pre-purchase evaluation through our tool loaner program.

Instructions:

Use the cutting tool to cut the tape at 90 degrees.	Using the pin guides, mount the brass clip onto the tool. Mount the two reels, center and clamp.
Remove a single strip of single splice tape.	Apply the strip to the top of the connecting reel.

P/N	Category	Qty/Unit
ST110	Splicing Tool	1 pc

Splicetronics Solutions will allow you increase manufacturing productivity and reduce operational costs
