Splicetronics Solutions

Splice Tape is used to join component reels and reduce pick & place machine down-time

Advantages:

- Designed specifically for SMD carrier tapes from 8mm to 44mm
- Ensures that SMD component reels can be joined securely and quickly
- Possible to mount tool for table top operations
- Used with the brass splice shim and splice tapes of any width

ST210 SPLICING TOOL

Description:

- Ergonomically designed for easy handling
- Includes longer 5mm guide pins for accurate reel placements
- Includes clamps to secure reels

* The splicing tool is available for pre-purchase evaluation through our tool loaner program.

P/N	Category	Qty/Unit
ST210	Splicing Tool	1 pc

Instructions:

	
Use the cutting tool to cut the tape at 90 degrees.	Using the pin guides, mount the brass clip onto the tool. Mount the two reels, center and clamp.
	
Remove a single strip of single splice tape.	Apply the strip to the top of the connecting reel.

Splicetronics Solutions will allow you increase manufacturing productivity and reduce operational costs
